

CRT Ch11

1.

No. Data in memory is temporary and volatile, while a file is stored permanently on disk.

2.

```
import java.io.File;
```

3.

Error: Backslashes (\) in the file path must be escaped.

4.

a) The statement is a catch.

b) Example:

```
try {  
    File file = new File("test.txt");  
    file.createNewFile();  
} catch (IOException e) {  
    System.out.println("Error creating file: " + e.getMessage());  
}
```

5.

a) System.err

b) They are displayed on the screen.

6.

a) The current position in the file.

b) A newline character or carriage return + newline (\r\n).

7.

FileWriter and PrintWriter.

8.

```
totalBalance += Double.parseDouble(balanceString);
```

9.

- **Serialization:** Converting an object into a stream of bytes to store in a file.
- **Deserialization:** Converting the byte stream back into an object.

10.

The Serializable interface must be implemented.
